PROFESSIONAL SUMMARY

GenAI Developer with Hands-on experience building LLM-powered RAG workflows using LangChain, OpenAI APIs, ChromaDB, and semantic retrieval pipelines for support automation use cases. Also, 3+ years of experience in enterprise software troubleshooting, production incident management, support, and cross-functional collaboration.

TECHNICAL SKILLS

AI / LLM: LangChain, LangGraph, RAG Pipelines, OpenAI APIs, Prompt Engineering, ChromaDB, Ollama, Hugging Face

Programming: Python, FastAPI, JavaScript, Java, SQL, REST APIs, Shell Scripting

Tools: Git, Linux, Docker (Basic), MongoDB, Firebase, Jupyter Notebook

EXPERIENCE

LLM-Powered Support Resolution Pipeline | Independent Project | Oracle

- Built an LLM-powered RAG workflow to automate support ticket analysis and resolution discovery.
- Implemented real-time web scraping pipelines to extract ticket summaries and contextual issue descriptions.
- Used LangChain and ChromaDB to retrieve semantically similar historical support resolutions.
- Integrated OpenAI APIs and text-embedding-3-small embeddings for semantic retrieval and contextual search.
- Designed prompt-engineering workflows to evaluate historical resolutions and identify quick implementable fixes.

Technical Solution Analyst | Oracle Feb 2023 – Present

- Managed production support and troubleshooting for enterprise healthcare systems within Cerner Millennium environments.
- Led resolution of high-priority production incidents (P1/P2), ensuring SLA compliance and minimizing customer impact.
- Analyzed application logs, investigated failures, and collaborated with engineering teams to drive issue resolution.
- Performed SQL-based diagnostics and Root Cause Analysis (RCA) for recurring production issues.
- Worked closely with Software Engineers, DevOps, Product, and L3 support teams to reproduce and escalate defects.
- Received Spot Award for resolving 80+ support requests during a queue-burst initiative.

Software Developer | Usurper Apps Oct 2022 – Feb 2023

- Developed mobile applications using Flutter, Firebase, and MongoDB.
- Implemented authentication systems, responsive UI workflows, and Google Maps integrations.

EDUCATION

Bachelor of Engineering in Information Science | Atria Institute of Technology | CGPA: 8.22/10

CERTIFICATIONS

- Generative AI and Prompt Engineering – Oracle
- Hands-On Machine Learning with Scikit-Learn, TensorFlow & Keras
- Developing Front-End Apps with React – Coursera
- LangGraph (In Progress)
